

Gas Terminology

Elemental Gases (made from one element only)
are:

Monatomic: He, Ne, Ar, Kr, Xe, Rn

Diatomic: H₂, N₂, O₂, F₂, Cl₂

Gases are one of the following:

Combustible - burn (H₂, CH₄ - methane, C₂H₂ -
acetylene)

Support Combustion (O₂ - oxygen, Cl₂ -
chlorine)

Extinguish Combustion (CO₂, Ne, Ar, ...)
