Good Morning All:

Hope you had a good weekend! Almost felt like spring yesterday!

Please check in: <https://forms.office.com/Pages/ResponsePage.aspx?id=GAmPRLReCU2WCd35yhGvQsuodiaVPQJHoMguHaAhWSBUMIRTNzMzNDRUS0IZVU1MS1pIN0JEVUozRSQIQCN0PWcu>

The plan today is to hand in a completed answers for question #3 on test #6 - see attached. You may notice that the answers for this test have mysteriously disappeared. That means, if you want to check your answers you will need to find them elsewhere. And, some of the test answers are less than adequate. Please read the question carefully.

I have added a video to the molecular architecture page. It is in the pink sections and qualifies as optional work. Please do as you see fit. The last third of the video deals with orbital hybridization theory, which is difficult but worth being familiar with. I leave this up to you.

You will need your calculators tomorrow. Moving on to titrations.

Have a good day.

Mr. Schlenker
