Hello All:

Hope you are all well. The conversion assignment has gone fairly well. The details are important.

Please Check In: <https://forms.office.com/Pages/ResponsePage.aspx?id=GAmPRLReCU2WCd35yhGvQsuodiaVPQJHoMguHaAhWSBUMFI0RjBIUDRBVERRWkiUTVc3OEIMVzBRNiQIQCN0PWcu>

If you haven't checked in, please go back and check in!

If you still haven't checked in, please go back two steps and check in!

New learning today. I have posted a video on the website. In the titrations unit. Please remember to select the 1080p option in the little youtube gear on the lower right of the viewing screen. This will ensure adequate quality. At the time that I have sent this email, the video was not completely uploaded and processed. Should be available before 11:00 a.m.

We will be working on titrations for several days. This is the beginning of the next learning curve. It is a fairly small curve, so learning "bumb" might be a better description.

If you get a descent start on the first worksheet, that will be good enough for today <http://www.schlenkerchem.org/4U/4U%20titrations/worksheets/ws%20titration%20questions1.pdf>, answer are on the website.

If you get as far as question #5 that will be good.

Enjoy!

Mr. Schlenker
