

SCH 4U - 2020-05-04 (Monday)

From: Fred Schlenker <fred_schlenker@bwdsb.on.ca>

Date: Mon, 4 May 2020 13:02:08 +0000 (2020-05-04 09:02:08 AM)

Good Morning All:

I hope you had a good weekend. There was some nice sunshine. If you happened to have been outside with any exposed skin, you will have improved the concentration of vitamin D in your body! Vitamin D is made in your skin through a photo-chemical reaction that requires ultraviolet light (from the sun) in conjunction with precursor molecules that are easily made in skin cells! Hope you enjoyed this chemistry tidbit.

Please Check In: <https://forms.office.com/Pages/ResponsePage.aspx?id=GAmPRLReCU2WCd35yhGvQsuodiaVPQJHoMguHaAhWSBUQjFBUzRMVk9ERE9HMjBWSVZGUTIEOUIWNSQIQCN0PWcu>

The goal today is one more day of titration practice questions. There are several practice tests available on the website. Tomorrow I am going to ask you to answers and submit two questions. One will be fairly straight forward, the other will be more involved. Given the nature of these questions, your submission will be a .pdf or picture of your work. In spite of the overwhelming preference for a form style submission. (To me honest, the form style was not that strong of a preference when you consider that one of you classmates decided to try to skew the results by filling out the form nine times! Nice try!)

When we are finished the work tomorrow, we will start the next unit on Wednesday.

Have a great day.

Mr. Schlenker
